SUMMARY

Design Engineer (MSc Design Engineering, Imperial College London) with a 1st-class BEng in Mechanical Engineering. Experienced in CAD, FEA, rapid prototyping and user-centred research. Led multidisciplinary projects for NASA rover terrain sensing, thermoacoustic cooling, fashion-tech startup and ADHD wearable ecosystem. Proficient in SolidWorks, Fusion 360, ANSYS and basic Python.

WORK EXPERIENCE

University of Huddersfield — Class Representative	Jan 2022 – May 2024
• Represented the student body as Class Representative at the University of Huddersfield. • Acted as a liaison between students and faculty to ensure transparent communication • Collected and organized student feedback on academic and course-related concerns. • Proposed actionable improvements to course content and delivery. • Maintained a proactive, solutions-oriented approach to enhance the overall academic experience.	

PROJECTS

REDSense - Student Design Engineer	10/2024-01/2025
• Collaborated on a NASA-backed project for the Curiosity Rover's terrain-sensing system. • Contributed to CAD modeling and FEA analysis for sensor integration and structural validation. • Designed and assembled a functional test rig for experimental evaluation. • Conducted testing and supported data post-processing and interpretation. • Assisted in technical reporting and strategy development for sensor placement optimization.	
ATT - Human-Centered Designer	10/2024-01/2025
• Designed a wearable-based passive tracking system to assist in ADHD monitoring. • Conducted user research to identify behavioral pain points and design opportunities. • Developed ecosystem flow, device concept, and user interaction strategies. • Focused on non-invasive, data-driven support for long-term behavioral insights. • Resented as a human-centered design solution in an academic innovation module.	
STYLE BY ME - Founder and CEO	02/2025-04/2025
• Originated and led the development of Style by Me, a personalized fashion subscription venture. • Executed as part of a graduate coursework project focused on venture design and validation. • Led a multidisciplinary team through user research, service design, and rapid prototyping. • Defined and implemented go-to-market strategy tailored to India's emerging middle class. • Drove business model validation and created investor pitch materials for concept presentation.	

EDUCATION

Imperial College London - MSc Design Engineering	09/2024 - Present
• Focused on product innovation, mechanical systems, and user-centered design in multidisciplinary team projects. • Applied CAD, FEA, and rapid prototyping to develop and validate functional concepts. • Built digital skills in KeyShot, Blender, and user research methodologies to support design decisions.	
University of Huddersfield - BEng Mechanical Engineering (Honours)	01/2022-06/2024
• Gained hands-on experience in mechanical systems design and simulation through lab-based and group projects. • Used SolidWorks and ANSYS for prototyping, structural analysis, FEA, and thermal systems engineering. • Developed a strong foundation in validating designs through practical and computational methods.	

SKILLS

- Mechanical & Product Design (SolidWorks, Fusion 360)
- Rendering & Concept Visualization (KeyShot, Blender, Vizcom, Midjourney)
- 3D Printing (FDM/SLA) & Rapid Prototyping
- User-Centered Design (User Interviews & Usability Testing)
- Technical Reporting & Design Pitching
- ANSYS FEA & Structural Analysis
- Thermoacoustic & Thermal Systems Modelling
- Cross-Functional Team Leadership (Start-up Venture)

AWARDS

FUTURE INDIA LEADER SCHOLARSHIP	08/2024
Imperial College London	
TOPPER OF THE BATCH	05/2024
University Of Huddersfield
